employees table

columns	types
id	int
first_name	varchar
last_name	varchar
salary	int
department_id	int

departments table

columns	types
id	int
name	varchar

Given the tables above, select the top 3 departments with at least ten employees and rank them according to the percentage of their employees making over 100K in salary.

Example output:

percentage_over_100K	department name	number of employees
.9	engineering	25
.5	marketing	50
.12	sales	12
